

FACTORY OF
GEO. H. FULLER & SON COMPANY

During our sixty-two years' experience manufacturing JEWELERS' FINDINGS we have made a large variety of metal parts, in various qualities, used in the manufacture and repairing of Jewelry and its kindred lines.

In compiling this condensed Catalog we have endeavored to show only a staple line of Findings mostly needed to meet the requirements of the Trade. Correspondence relative to items not shown is solicited.

SYMMETRICAL BOWS

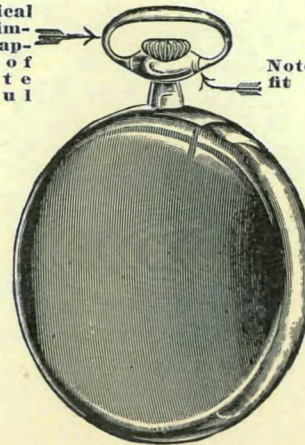

— PATENT APPLIED FOR —

Here is a Scientifically Designed Bow, which is well balanced, gracefully proportioned and can be used on any make of Thin Model, or regular Watch Cases. The Symmetrical construction adds to strength of the Bow.

The Bows are interchangeable—are the proper width to fit the long narrow pendants and can also be used on the old style pendants in place of the regular Antique, French Antique and Fancy Bows.

Symmetrical
shape im-
proves ap-
pearance of
case. Note
graceful
lines

Note the close
fit
to pen-
dant

Note the shoulders on the ends — these shoulders cover the openings and fit snug to the pendants, giving a very graceful effect to the pendants.

These Bows have the recommendation of the leading Watch Case Manufacturers.

SYMMETRICAL BOWS

— PATENT APPLIED FOR —

This Scientifically Designed Bow, is adaptable for the wide range of different makes of Watch Cases — either Thin Model or Old Style. The Symmetrical construction adds to strength of the Bow, and improves the appearance of the Case.

FULLER'S "IDEAL" ONE PIECE PINSTEMS AND JOINTS

—PATENTED AUG. 9TH, 1910—

GENERALLY CONSIDERED—"THE SLICKEST AND NEATEST THING IN THE PINSTEM LINE"

The Joints are
"Reversible"

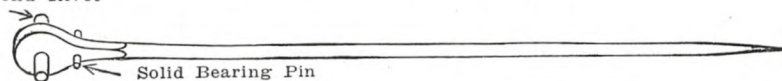

Can be soldered on
frontwards or back-
wards, they'll work
just the same.

Enlarged Illustration of Joint

Another good feature—Bear-
ing or Stop Pins which give
spring to the Pinstems and
make them hook up in the
Catch. These Pins also act as
Back Stops.

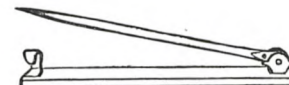

Solid Rivet

Enlarged Illustration of Pinstem

Pinstem and Rivet made in "ONE PIECE"—Impossible for Rivets
to work loose and fall out.

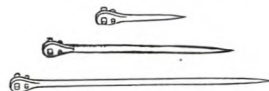

"Easiest to Fit."
Simply place Pinstem
in Joint, pinch the
sides together—head
the Rivet Pins
slightly and the
job is done.
